Projects

LearnSphere | *React.js, Node.js, MongoDB*

Dec 2025

- Devised a centralized learning platform for organized and efficient access to learning resources.
- Developed structured content display, user interaction, and smooth navigation with a responsive interface.
- Enabled easy discovery, organization, and engagement with learning materials, enhancing accessibility and user experience.
- Repository Link: <https://github.com/Rahulkala013/LearnSphere>

Algo Visualizer | *React.js, JavaScript, HTML, Tailwind CSS*

Oct 2025

- Created to visually demonstrate how different algorithms work, helping learners understand step-by-step execution.
- Implemented animations and controls for visualizing sorting and traversal algorithms such as Merge Sort, Quick Sort, Bubble Sort, BFS, and DFS.
- Improved clarity in algorithm behavior, enabling users to easily compare performance, operations, and complexity.
- Repository Link: <https://github.com/Rahulkala013/Algo-viz>

Fit Flow | *HTML, Tailwind CSS, JavaScript, PHP*

Apr 2025

- Designed a platform to help users easily access pre-defined workout plans and track their fitness data.
- Developed user authentication, data storage, and dynamic workout plans using PHP and PhpMyAdmin.
- Enabled responsive, account-based fitness tracking and personalized workout planning.
- Repository Link: <https://github.com/Rahulkala013/Fitflow>

Training

DSA using C++

- Learned core data structures including arrays, linked lists, stacks, queues, hash maps, trees, and heaps, and understood when and how to use them efficiently.
 - Practiced algorithmic techniques such as recursion, backtracking, sorting (merge, quick, heap), searching, and graph traversal
 - Improved problem-solving by analyzing time and space complexity and applying optimized coding approaches.
- CipherSchools: Certificate Link*

Certificates / Certifications

• ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM

Aug 2025

Infosys —Certificate Link

• Computational Theory

Aug 2025

Infosys —Certificate Link

• Master Generative AI & Generative AI tools

Aug 2025

Infosys —Certificate Link

• Cloud computing

Jun 2025

NPTEL —Certificate Link

Skills

Languages: Java, C, C++, Python, JavaScript, PHP

Framework: HTML, CSS, React.js, Node.js, Bootstrap, Tailwind CSS

Tools: Git, GitHub, VS Code, Postman, Figma, MongoDB

Domain Skills: Data Structures and Algorithm, Object Oriented Programming, Web Application Development

Education

Lovely Professional University

2023 – Present

Bachelor of Technology - Computer Science and Engineering — CGPA: 7.68

Phagwara, Punjab

T.C.G Public School

2021 – 2022

12th — Percentage: 81%

Kotdwar, Uttarakhand

T.C.G Public School

2019 – 2020

10th — Percentage: 92%

Kotdwar, Uttarakhand
